Jan 2024 - June 2025

Responsibilities:

- As a PHP Developer, I gained valuable experience as a web developer, honing my skills in frontend and backend development.
- Collaborated with cross-functional teams to deliver scalable software solutions.
- Developed and maintained web applications using PHP 8, Laravel, HTML5, CSS3, JavaScript, jQuery, and Bootstrap.
- Implement backend functionality using frameworks like Laravel, Yii in PHP.
- Utilize PHP, HTML, CSS, and JavaScript to create responsive and dynamic websites.
- Optimized existing code for improved performance and scalability of websites.
- Participated actively in the full Software Development Life Cycle (SDLC) including requirement analysis, development, testing, and deployment.
- Designed, optimized, and managed relational databases using MySQL and SQL Server ensuring data integrity and performance.
- Implemented RESTful backend logic, authentication modules, and role-based access control.
- Collaborated with UI/UX designers, QA testers, and project managers to deliver high-quality and scalable solutions.
- Fixed bugs, refactored legacy code, and improved application performance and security.
- Conducted code reviews and followed clean coding standard of OOP principles.
- Developed responsive and user-friendly interfaces for cross-browser compatibility.

Bit Technologies – Islamabad, Pakistan

Junior PHP Developer

March 2023 - Dec 2023

Responsibilities:

- Writing and maintaining PHP code for web applications.
- Using HTML, CSS, and basic JavaScript alongside PHP.
- Hands-on experience with MySQL databases and CRUD operations.
- Assisting in building backend features (forms, authentication, APIs).
- Fixing bugs and improving existing code.
- Experience using the Laravel PHP framework.
- Following coding standards and best practices.

- Using Git for version control.
- Collaborating with designers and senior developers.
- Collaborated with cross-functional teams and optimized application performance.

Globosoft Technologies – Islamabad, Pakistan

PHP Developer Intern

Sept 2022 - Mar 2023

Responsibilities:

- Developed PHP-based modules and database functionality.
- Worked with senior developers to implement backend features and debugging.
- Worked with MySQL, Git, and basic Laravel features.
- Gained hands-on experience in real-world web projects.
- Created and updated CRUD modules for database-driven applications.
- Used HTML, CSS, and basic JavaScript to integrate frontend with backend logic.
- Gained hands-on experience with MVC architecture using the Laravel framework.
- Performed database operations and wrote optimized SQL queries.
- Maintained coding standards and implemented basic security measures such as input validation and password hashing.

Projects

SPS Excess Inventory Tool: Developed a PHP-based system to manage surplus inventory, featuring role-based access, dynamic reports, and optimized database queries.

HR Management System: Built an employee automation system including attendance, leave management, and employee records using PHP and MySQL.

University Admission Portal: Designed a dynamic portal for student admissions, form validation, admin dashboards, and application tracking.

Doctor Consultancy Website: Created an online appointment and consultation platform with patient booking, doctor profiles, and admin management.
